

SASKTEL CLOUD BACKUP

THE VALUE OF YOUR DATA

- How do you back up your most critical data? Is it a manual process?
- In the event of data loss, what is your plan to restore data and who executes the plan?
- How much time, money, and credibility would you lose trying to recover lost data?
- Already have a backup solution? Do you know where your data is stored and how secure it is?

With SaskTel Cloud Backup, you can protect your business from hardware defects, lost or stolen devices, employee error, natural disasters, and cyber security threats like ransomware or cyberattacks.

- Easily and quickly back up and restore your data
- Backup jobs are automated and executed every day
- Access an online self-serve portal available anytime, from anywhere
- Data is safe and secure in our world-class Data Centres that guarantee a 99.9% uptime so your data is available when you need it

Our Data Centres are located in Saskatchewan, a geographically stable area, and are built to the standards of the telecommunications industry to meet data centre best practices, which provide you with high availability equivalent to the standards required for emergency services.

SASKTEL IS YOUR PARTNER IN BUSINESS

Your business deserves a trusted partner dedicated to helping you get started and growing your business into the future. At SaskTel, we not only offer a unique suite of communications and IT solutions with enterprise networks built and powered by us, but we work with other industry-leading companies to help deliver the solutions you need to effectively manage your business and thrive through technology.

We have been committed to connecting businesses for over 100 years and are a partner you can depend on to continue to invest in technology that is reliable and resilient for the next 100 years. With a proven track record of serving and helping national and international businesses solve problems and succeed, we look forward to connecting with you to serve and grow your business.

SASKTEL CLOUD BACKUP
