

# SASKTEL CLOUD HOSTING

## PROTECT YOUR CRITICAL DATA

- What could your IT staff do to grow your business if they had 15 hours per week freed up?
- How well are your servers protected? From intrusion, fire, or an overheating office?
- How easily can you adapt your IT capacity as your business needs change?
- What business initiatives do you want your IT staff working on? Does managing your IT equipment preoccupy their time?

Keep your data and applications secure and available so you can focus on your customers and growing your business.

- Avoid major capital investments, such as building your own data centre, purchasing IT equipment, or paying travel to manage IT environment
- Reallocate people and time to activities that will grow your business and better serve your customers
- SaskTel-owned and managed hardware and operating systems

Our Data Centres are located in Saskatchewan, a geographically stable area, and are built to the standards of the telecommunications industry to meet data centre best practices, which provide you with high availability equivalent to the standards required for emergency services.
