

# SASKTEL COLOCATION

## YOUR EQUIPMENT, OUR INFRASTRUCTURE

- What could you do if the space occupied by your IT environment was freed up?
- Are you allocating time and money housing your IT equipment? Could those resources be better allocated somewhere else?

Set up your server in our Tier III Colocation Data Centre and walk away confidently knowing you will have access to your applications and data when you need them.

- Protect your business-critical equipment with extensive security measures, including bio-metric scanning, key cards, and guards
- Maintain full control and ownership over your hardware, applications, and data
- Reduce downtime due to an outage with 99.99% availability to increase uptime and better serve your customers

Our Data Centres are located in Saskatchewan, a geographically stable area, and are built to the standards of the telecommunications industry to meet data centre best practices, which provide you with high availability equivalent to the standards required for emergency services.

# SASKTEL COLOCATION

"We've moved our recovery time objective down to hours as opposed to weeks."

— Ed Grassie, Canpotex

## SASKTEL IS YOUR PARTNER IN BUSINESS

Your business deserves a trusted partner dedicated to helping you get started and growing your business into the future. At SaskTel, we not only offer a unique suite of communications and IT solutions with enterprise networks built and powered by us, but we work with other industry-leading companies to help deliver the solutions you need to effectively manage your business and thrive through technology.

We have been committed to connecting businesses for over 100 years and are a partner you can depend on to continue to invest in technology that is reliable and resilient for the next 100 years. With a proven track record of serving and helping national and international businesses solve problems and succeed, we look forward to connecting with you to serve and grow your business.

Let's start a conversation.
